Fresh Coop Dust Bath

For Your Backyard Flock

OMRI® Listed for use in Organic Production

A dust bath is an important part of your flock's hygiene. For a healthy and clean flock have available a bathing area.

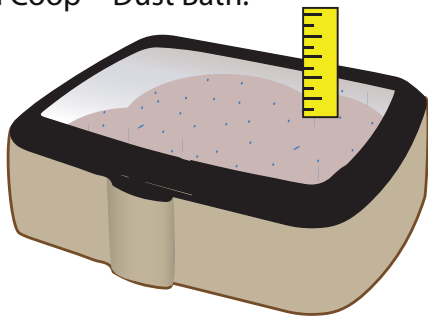

WE ❤️ OUR DUST BATH!

TIP: To cool down your flock during hot summer days, place a dust bath in the shade. In cooler weather provide a dust bath on a sunny spot.

Small Flock (1-3 Birds)

Purchase a large kitty litter pan (or Rubbermaid tub) and fill 3-4" deep with Fresh Coop™ Dust Bath.

TIP: Digging a shallow hole to place your container will anchor your dust bath in place.

Large Flock (8+ Birds)

For the larger flocks, a kiddie pool or turtle sandbox make great dust bath containers. Fill 3-4" deep with Fresh Coop™ Dust Bath.

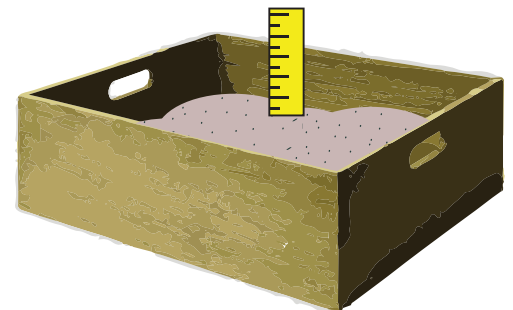

If your flock is free ranged, Sprinkle Fresh Coop™ Dust Bath over the existing dust bath area or make an area close to the coop 2-3" deep.

TIP: To avoid containers filling with water drill 4-5 small holes along the bottom.

Medium Flock (3-7 Birds)

Provide a 2' by 3' wooden box filled 3-4" deep with Fresh Coop™ Dust Bath.
